

Multi-material drill bit with cylindrical shank and sharpened carbide insert
The sharpened carbide insert allows drilling into very hard materials such as high-strength steels (locks, safes). It is also suitable for drilling slate, hollow bricks, or composite materials. Do not use the hammer mode for drilling.

VERSATILITY

SHARPENED CARBIDE INSERT

Multi-material drilling

CENTERING POINT

Easy primer with a clean hole

L-SHAPED FLUTE WITH THIN RIM

Fast and efficient penetration

SHARPENED CARBIDE TIP

Clean hole, no splinters
